Steel and aluminium gutter protection systems

Not all gutter guards are the same. We're leading the revolution.

Our climate. It's one of the best things about Australia. But it can show us some tough love too. Over the years, Australians have witnessed the devastating impact of bushfires, storms and floods on our homes too many times to count.

Protect your home from our harsh climate with Blue Mountain Mesh, an advanced gutter protection system that prevents leaves and debris from entering gutters. Our entire range is bushfire compliant and offers safety, flexibility and value without compromising the look of your home.

Why do you need gutter protection?

Feel you're forever on a ladder cleaning your home's gutters? Concerned about how your home would fare in a bushfire? Worried about the potential for pests and vermin to invade your roof and downpipes?

Without gutter protection in place, you could be putting your home and your safety at risk. A trusted gutter protection solution can significantly reduce the amount of debris and leaf matter that enters and accumulates in your gutters.

This means you will be safer and your gutters will perform better, and last longer. Most importantly, you're also dramatically reducing required maintenance, and giving your home an added layer of protection against bushfires and storms.

The benefits of Blue Mountain Mesh gutter protection.

Ensure debris-free gutters

A build up of unwanted leaves and other debris in your gutters can cause serious maintenance issues. It can lead to an increased risk of flooding, as well as pest and vermin infestation.

Low maintenance

Unprotected gutters require more frequent cleaning, which can be time consuming, and potentially unsafe. Blue Mountain Mesh gutter protection prevents debris and leaves from accumulating in the first place - significantly improving the overall safety and performance of your gutter system.

Protect against pests and vermin

Unprotected gutters can provide a convenient entry point to your warm and inviting roof space, which then becomes a nesting site and food source for a host of common household pests such as birds, possums, rats, mice and snakes.

Avoid floods and water damage

With Blue Mountain Mesh, your gutters are able to transport rainwater the way they're designed to, significantly reducing the risk of flooding in storms and heavy rain, as well as the likelihood of damage to your walls and ceilings if your home were to flood.

Improve water quality

If you have a rainwater harvesting system, installing a gutter guard is vital - to ensure clean, usable water. By keeping gutters free from leaves and debris, you also minimise wastage and collect the greatest possible volume.

Protect your home from ember attack

Ember attack is where sparks and embers landing on your home trigger a fire, well before and hours after a bushfire has passed. As well as acting as a gutter guard, Blue Mountain Mesh 2mm Superfine mesh acts as an ember guard, by preventing embers from entering your roof cavity.

Why Choose Blue Mountain Mesh?

There are many reasons to choose Blue Mountain Mesh.

Made to last, durable, and conforming to rigorous industry standards, Blue Mountain Mesh is a clear market leader.

Our Australian-designed range has been proven to withstand Australia's harsh elements. We have a custom designed gutter guard to suit every situation, and our proprietary fixing systems are easy to install and second to none.

Steel for strength and durability

The strength of steel will outlast and outperform other materials. It provides the surest defence against ember attack, hail storms and pest intrusion. Importantly, it's also non-combustible and corrosion resistant, and the quality of our range is guaranteed via independent tests by Uniquist and CSIRO. Blue Mountain Mesh is built to last. Our tough, hot-dipped galvanised steel is specifically built for strength and durability and comes with a 12 year guarantee.

Tailored solutions to fit just about every roof

- + Not every tree is the same
- + Not every roof is the same
- + Not every environment is the same

That's why we offer a unique customised solution to meet your homes specific needs.

Designed to blend into every roof

We recognise that the aesthetic of your home is very important. It's why we offer Blue Mountain Mesh to fit all gutter profiles and suit just about all roof types. All our products are custom-made, and while they're designed to match the COLORBOND® colour range, our products are also available in virtually any colour you request so it looks like a seamless addition to your home.

Matched to the colour of your roof

Blue Mountain Mesh Steel gutter guard and componentry fits all gutter profiles and we can adapt it for just about all roof types. It's custom-made and available in the COLORBOND® colour range.

Blue Mountain Mesh Aluminium gutter guard is available in popular COLORBOND® colours and to suit corrugated, tile and Trimdek®/ Monoclad® roofs.

Australian designed and engineered

We have a dedicated design and engineering team focused on developing unique gutter mesh systems and fixings to improve strength, appearance and speed of installation.

Unique fixing system

Blue Mountain Mesh unique fixing systems have been designed to fix to just about every roof type seamlessly and attractively.

All Blue Mountain Mesh comes in a kit with all the components you need to install it on your roof.

Expert customer support: Tech Talk

We offer customer and installer support from ordering through to installation. Simply call us and we will help configure a completely customised solution that is right for you and your home. Contact our in-house experts to discuss the right solution for your site, the right solution for the surrounding environment, quantities and ordering or installation advice.

Bushfire building regulations: Ember guard compliant

Blue Mountain Mesh proudly design and build to meet industry standards. Our 2mm ember guard is an industry benchmark – a combined ember and gutter guard specifically designed to meet the latest stringent bushfire building standards, and ensuring maximum fire protection.

How Blue Mountain Mesh works

- + Our over-the-gutter system forms a physical barrier to prevent leaves and debris from entering gutters.
- + The ski-slope design ensures leaves and debris are blown off the roof whilst water is drawn through the mesh guard into the gutter.
- + Blue Mountain Mesh is available either as steel or aluminium mesh.
- + Gutters are kept from getting blocked, which prevents flooding of eaves, ceiling and wall cavities.
- + Extra protection is provided from hail and flooding rains during storms.

Steel Gutter Guard

Strong, custom made

Blue Mountain Mesh steel gutter guard is hot-dipped, galvanised, zinc-coated steel that is custom made to suit all roof and gutter types. Our patented profiles and clips ensures our steel gutter guard lies perfectly flat and means the product looks like a seamless addition to your roof.

Designed to blend with your home.

Blue Mountain Mesh steel gutter guard is custom made and designed to match the COLORBOND® colour range.

Componentry - It's all in the kit

Blue Mountain Mesh steel gutter guard is sold as a kit so there is no need to calculate component quantities.

Need some advice about Blue Mountain Mesh?

Tech Talk is a free practical information service offering expert advice on Blue Mountain Mesh gutter guard and ember guard solutions. Our in-house Tech Talk expert has 13 years specifically installing Blue Mountain Mesh gutter guard and almost 30 years experience on the roof and around gutters.

2mm Superfine Steel Gutter Guard

- + Ideal for areas with small leaf trees (e.g. Jacaranda or Leopard trees) and fine debris
- + Ideal for use on properties that require ember guard protection (compliant to Australian Standard AS3959-2009/Amdt2011, with proven compliance at all Bushfire Attack Levels)
- + Matches the COLORBOND® colour range
- + Kits include metal gutter trim as a standard component

2mm Superfine Steel Gutter Guard

Description	Code
BMM Steel 2mm Corro Roll Metal Trim (300mm wide)	BM112
BMM Steel 2mm Corro Sheet Metal Trim (327mm wide)	BM113
BMM Steel 2mm Tile Roll Metal Trim (450mm wide)	BM212
BMM Steel 2mm Tile Sheet Metal Trim (450mm wide)	BM213
BMM Steel 2mm Trimdek® Roll Metal Trim (360mm wide)	BM312
BMM Steel 2mm Trimdek® Sheet Metal Trim (387mm wide)	BM313
BMM Steel 2mm Corro Flashed Valley Roll (300mm wide)	BM411
BMM Steel 2mm Domed Valley Sheet (up to 300mm wide)	BM410

Gutter Guard Vs Ember Guard

A **Gutter Guard** is designed to minimize the access of debris and leaf litter to the gutters of your home. In a bushfire-prone area it is not mandatory, but if you are installing a gutter guard it must be non-combustible.

An **Ember Guard** is designed to limit access of embers into areas of risk, like the roof cavity. It must:

- + be non-combustible
- + have a maximum aperture (or gap) of 2mm.
- + be made of corrosion-resistant steel, bronze or aluminium in BAL 12.5 – BAL 29
- + be made of corrosion-resistant steel or bronze in BAL 40 & BAL FZ.

4mm Super Steel Gutter Guard

- + Ideal for medium size leaves and debris (e.g. Gum trees with associated gumnuts and leaves, and Chinese Elm)
- + The strength of this mesh also provides extra protection from hail and pests
- + Bushfire compliant to Australian Standard AS3959-2009, compliant for non-combustibility
- + Matches the COLORBOND® colour range

4mm Super Steel Gutter Guard

Description	Code
BMM Steel 4mm Corro Roll No Trim (300mm wide)	BM106

BMM Steel 5.4mm Trimdek® Sheet No Trim (387mm wide)	BM303
BMM Steel 5.4mm Trimdek® Sheet Metal Trim (387mm wide)	BM304

Metal Gutter Trim is optional for 4mm Super and 5.4mm Standard gutter guard. If you are ordering kits with metal gutter trim, make sure you match the mesh colour to your roof colour and the trim colour to your gutter colour.

Aluminium Gutter Guard

Flexible, ready made

Blue Mountain Mesh aluminium gutter guard is a flexible, lightweight, easy to install gutter solution to keep leaves and debris out of gutters and downpipes. Blue Mountain Mesh aluminium gutter guard is suitable for corrugated, tile and Trimdek®/Monoclad® roof types, and to suit popular COLORBOND® colours. Kits include; aluminium mesh (10m, 15m and 30m ready-made rolls), saddles (for corrugated and Trimdek®/Monoclad® roofs), screws and metal trim (recommended).

Designed to blend with your home.

Blue Mountain Mesh aluminium gutter guard is available to suit most popular COLORBOND® colours.

*Colour Matched Aluminium Mesh - see below
**Only available in 10m & 30m rolls to suit tile gutter and valleys

*COLOUR MATCHED ALUMINIUM MESH

Blue Mountain Mesh aluminium gutter guard is available to suit most popular COLORBOND® colours.

Exact mesh colours are not available for some popular COLORBOND® colours. In these instances, Blue Mountain Mesh provide componentry (saddles, trim and screws) in the specified COLORBOND® colour and the mesh in the closest compatible COLORBOND® colour. Blue Mountain Mesh has chosen the closest match possible to provide a seamless addition to the roof and gutters.

Colour Matched Mesh colours are;

- + Zincalume® (Zincalume® componentry with Shale Grey™ aluminium mesh)
- + Dune® (Dune® componentry with Shale Grey™ aluminium mesh)
- + Bushland® (Bushland® componentry with Windspray® aluminium mesh)
- + Wilderness® (Wilderness® componentry with Pale Eucalypt® aluminium mesh).

4mm Aluminium Gutter Guard

- ✚ Flexible, lightweight, easy to install
- ✚ Keeps leaves and debris out of gutters and downpipes
- ✚ Available in popular COLORBOND® colours
- ✚ **Aperture:** Aluminium is only available in 4mm aperture mesh
- ✚ **Sheets/Rolls:** Aluminium is only available in rolls (10m, 15m and 30m ready-made rolls)
- ✚ **Roof Types:** Aluminium is only available for corrugated, tile and Trimdek® roofs

4mm Aluminium Gutter Guard

Description	Code
BMM Aluminium 4mm Corro Roll No Trim (250mm wide)	BM500
BMM Aluminium 4mm Corro Roll Metal Trim (250mm wide)	BM501
BMM Aluminium 4mm Corro Valley Roll (250mm wide)	BM503
BMM Aluminium 4mm Tile Roll No Trim (500mm wide)	BM504
BMM Aluminium 4mm Tile Roll Metal Trim (500mm wide)	BM505
BMM Aluminium 4mm Tile Valley Roll (750mm wide)	BM511
BMM Aluminium 4mm Trimdek® Roll No Trim (250mm wide)	BM507
BMM Aluminium 4mm Trimdek® Roll Metal Trim (250mm wide)	BM508

Componentry - It's all in the kit

All kits include mesh and the appropriate componentry to complete the installation.

Mesh Rolls

Corrugated Saddles

Trimdek® Saddles

Metal Screws

Metal Gutter Trim (recommended)
